

Intellevation Press Release – Glasgow, Scotland, UK, 7th May 2009

Intellevation Appoints ASI as US Distributor

Intellevation is pleased to announce that Applied Science Industries (ASI) will serve as the exclusive US distributor for Intellevation's optical monitoring and laser endpoint product lines, and will offer enhanced service, system integration and technical support throughout the US.

"We believe ASI has the perfect skill set to enhance our product offering and customer experience in the US," said Intellevation CEO Simon Hicks. "In addition to sales, ASI will offer US-based integration and technical support to help our customers rapidly get started with optical monitoring. We know our customers will quickly see the benefits and that's why we are really pleased to be working with them."

Applied Science Industries president Brandon Frazier commented, "Intellevation's product line is a great fit for ASI, and we look forward to helping them expand their US product and service offerings."

Headquartered in Glasgow, Scotland, Intellevation manufactures optical monitoring and laser endpoint detection systems for thin film coating and etch applications. Applied Science Industries, based in Monrovia, MD, provides sales, engineering and service support for vacuum and laser/optical systems and components.
